SPECIAL NOTICE TO RECIPIENTS OF REPORT NO. FT-130
"UNITED STATES IMPORTS OF COTTON MANUFACTURES"

January 1960 Issue

As a result of an error in preparing the January 1960 issue of Report No. FT-130, the heading on pages 6 through 11 of the report incorrectly reads, "UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION." The heading on these pages should read, "UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES." In addition, the Columnar heading on these pages reads, "Schedule A Number" but should read, "Commodity Number."

Users of this report are asked to make appropriate changes in the format of their copies of the report to reflect the foregoing revisions.

J. Edward Ely
Chief, Foreign Trade Division
Bureau of the Census

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports covered by informal entries or individually valued less than $100 and reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country.(Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

VERIFICATION OF THE DATA ON A 10 PERCENT BASIS BEGINNING OCTOBER 1957

For the months of July-September 1957 an attempt waa made to obtain verification from Customs officiala for data on all cotton manufactures, and about 90 percent of the total value of the data ahown in imports for those months was verified by Customs officials prior to publication of the data. Beginning with imports for the month of October thia verification procedure has been limited to a 10 percent aample of cotton import shipments. This change in procedure was based on the aasumption that by October, importers would be able to report their imports in reaaonably accurate terms, aince they would have had three months in which to become familiar with the new commodity claasifications. The verification of the 10 percent sample for October and subsequent months has two purposea: (1) errors made by importers and found in this 10 percent sample are being called to the attention of the importers so that they will not make similar errora on future importations; (2) the 10 percent aample givea some information as to the accuracy of clasaification of total importa as reported by the importer.

ANALYSIS OF THE 10 PERCENT VERIFICATION

In view of the limited number of items in the universe (and in the sample) for many of the individual commodity classifications, the 10 percent verification providea more information as to the degree of reliability on a cumulative basis than on a monthly basis.

Based on a 10 percent sample for the period October 1957-September 1959, it appears that claasifications for about three percent of the importations have been declared incorrectly by importers. However, aince the average value of the shipments reported incorrectly during this period was about 25 percent lower than the average value of all cotton manufactures, the value of the imported cotton manufactures reported incorrectly in the statistics is expected to be somewhat lesa than three percent of the total. It should be noted that the effect of the errora on figures for individual commodities or commodity groupings may actually be greater than the dollar value of the errors themselves, aince one error frequently means that one of the commoditiea or groupings is overcounted, and another ia correspondingly undercounted. On the other hand there is, of course aome cancellation of errors in the figures for individual classifications.

Of the 20 commodity groupings shown on page 5 of this report, two (11 and 23) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the sample. For commodity grouping 11 there were 2 errors out of 32 in the sample and for commodity grouping 23, 8 out of 101. For the other eighteen, there were either no errors found in the sample of 20 or more, or errors were found in a ratio of less than 1 out of 20.

Of the 114 individual commodity classifications under which cotton manufactures have been reported during the period October 1957-September 1959, the following 64 had 20 or more items in the sample.

021	161	227	415	523	632	722
042	162	230	420	527	642	742
105	171	235	425	535	652	752
107	172	302	440	545	672	762
109	181	312	445	549	682	872
111	182	332	455	552	692	882
121	205	362	503	562	700	892
122	220	400	505	572	705	905
152	223	405	520	622	712	910
						915

Nineteen of the above 64 classifications (223, 312, 362, 405, 415, 420, 445, 523, 527, 572, 622, 632, 672, 682, 712, 722, 762, 872, and 892) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the aample. For commodity number 223, there were 8 errors out of 86 in the sample; for commodity number 312, 3 out of 34; for commodity number 362, 2 out of 21; for commodity number 405, 1 out of 20; for commodity number 415, 5 out of 74; for commodity number 420, 3 out of 54; for commodity number 445, 4 out of 73; for commodity number 523, 4 out of 52; for commodity number 527, 2 out of 39; for commodity number 572, 6 out of 55; for commodity number 622, 4 out of 79; for commodity number 632, 6 out of 88; for commodity number 672, 7 out of 38; for commodity number 682, 9 out of 34; for commodity number 712, 3 out of 50; for commodity number 722, 7 out of 64; for commodity number 762, 5 out of 83; for commodity number 872, 5 out of 24; and for commodity number 892, 4 out of 38. For the other 45, there were either no errors found in the aample of 20 or more, or errors were found in a ratio of lesa than 1 out of 20. The value overcounting or undercounting for any individual commodity or commodity grouping might of course be higher or lower than the item overcounting or undercounting, although on the average it could be expected to be somewhat lower aince the average value for errors was lower than the average value for non-error shipments.

The comparison of error items found to total items in the sample for commodity groupings or commodities with leas than 20 in the sample is not particularly meaningful. Information on the results of the sample verification will continue to be shown on a cumulative baais, beginning with results for the October 1957 data, in subaequent issuea of Report FT 130. Information on the proportion of items in error will then be shown for additional commodity groupings and commodities as the cumulative sample reachea 20 for each of them.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES, BY GROUPINGS OF COMMODITIES

Commodity grouping number	Commodity grouping description and unit of quantity (and commodity numbers included in the commodity grouping)		Quantity	Value (dollars)
	TOTAL IMPORTS		.....	23,677,236
	COTTON YARN AND CLOTH		.....	8,828,574

NOTICE

A service exists whereby users of this report may receive selected information from it about two weeks prior to the release of the printed report. This service is available on payment of the cost of making and transmitting a special copy of the selected information. The cost for this service generally runs a few dollars a month for one or two commodity classifications, the cost being higher if a large number of figures are requested. These "advance" reports are described in the April 1958 *Foreign Trade Statistics Notes* and new "advance" reports are listed (together with their cost) in monthly issues of the *Notes* when they are first started.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Imports of Cotton, Statistics, Report FT 130, February, 1960. Washington 25, D. C. June, 1960.

For sale by the Bureau of the Census, Washington 25, D. C. Price 20 cents (single copy). Subscription price: $1.

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports covered by informal entries or individually valued less than $100 and reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country.(Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

VERIFICATION OF THE DATA ON A 10 PERCENT BASIS BEGINNING OCTOBER 1957

For the months of July-September 1957 an attempt was made to obtain verification from Customs officials for data on all cotton manufactures, and about 90 percent of the total value of the data shown in imports for those months was verified by Customs officials prior to publication of the data. Beginning with imports for the month of October this verification procedure has been limited to a 10 percent sample of cotton import shipments. This change in procedure was based on the assumption that by October, importers would be able to report their imports in reasonably accurate terms, since they would have had three months in which to become familiar with the new commodity classifications. The verification of the 10 percent sample for October, and subsequent months has two purposes: (1) errors made by importers and found in this 10 percent sample are being called to the attention of the importers so that they will not make similar errors on future importations; (2) the 10 percent sample gives some information as to the accuracy of classification of total imports as reported by the importer.

ANALYSIS OF THE 10 PERCENT VERIFICATION

In view of the limited number of items in the universe (and in the sample) for many of the individual commodity classifications, the 10 percent verification provides more information as to the degree of reliability on a cumulative basis than on a monthly basis.

Based on a 10 percent sample for the period October 1957-October 1959, it appears that classifications for about three percent of the importations have been declared incorrectly by importers. However, since the average value of the shipments reported incorrectly during this period was about 25 percent lower than the average value of all cotton manufactures, the value of the imported cotton manufactures reported incorrectly in the statistics is expected to be somewhat less than three percent of the total. It should be noted that the effect of the errors on figures for individual commodities or commodity groupings may actually be greater than the dollar value of the errors themselves, since one error frequently means that one of the commodities or groupings is overcounted, and another is correspondingly undercounted. On the other hand there is, of course some cancellation of errors in the figures for individual classifications.

Of the 20 commodity groupings shown on page 5 of this report, two (11 and 23) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the sample. For commodity grouping 11 there were 2 errors out of 35 in the sample and for commodity grouping 23, 6 out of 109. For the other eighteen, there were either no errors found in the sample of 20 or more, or errors were found in a ratio of less than 1 out of 20.

Of the 114 individual commodity classifications under which cotton manufactures have been reported during the period October 1957-October 1959, the following 64 had 20 or more items in the sample.

021	161	227	415	523	632	722
042	162	230	420	527	642	742
105	171	235	425	535	652	752
107	172	302	440	545	672	762
109	181	312	445	549	682	872
111	182	332	455	552	692	882
121	205	362	503	562	700	892
122	220	400	505	572	705	905
152	223	405	520	622	712	910
						915

Fourteen of the above 64 classifications (223, 312, 362, 445, 523, 572, 632, 672, 682, 712, 722, 872, 882, and 892) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the sample. For commodity number 223, there were 8 errors out of 96 in the sample; for commodity number 312, 3 out of 35; for commodity number 362, 2 out of 22; for commodity number 445, 4 out of 78; for commodity number 523, 4 out of 56; for commodity number 572, 6 out of 56; for commodity number 632, 6 out of 96; for commodity number 672, 8 out of 42; for commodity number 682, 9 out of 37; for commodity number 712, 3 out of 52; for commodity number 722, 7 out of 65; for commodity number 872, 5 out of 25; for commodity number 882, 2 out of 36; and for commodity number 892, 4 out of 38. For the other 50, there were either no errors found in the sample of 20 or more, or errors were found in a ratio of less than 1 out of 20. The value overcounting or undercounting for any individual commodity or commodity grouping might of course be higher or lower than the item overcounting or undercounting, although on the average it could be expected to be somewhat lower since the average value for errors was lower than the average value for non-error shipments.

The comparison of error items found to total items in the sample for commodity groupings or commodities with less than 20 in the sample is not particularly meaningful. Information on the results of the sample verification will continue to be shown on a cumulative basis, beginning with results for the October 1957 data, in subsequent issues of Report FT 130. Information on the proportion of items in error will then be shown for additional commodity groupings and commodities as the cumulative sample reaches 20 for each of them.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES, BY GROUPINGS OF COMMODITIES

Commodity grouping number	Commodity grouping description and unit of quantity (and commodity numbers included in the commodity grouping)		Quantity	Value (dollars)
	TOTAL IMPORTS		.....	22,720,598
	COTTON YARN AND CLOTH		.....	8,591,721
01	Cotton yarn (011-042)	Lb.	1,382,294	631,120
03	Ginghams (105-107)	Sq. yds.	5,791,649	1,283,905
05	Velveteens in the piece, cut or uncut (108-109)	Sq. yds.	39,043	27,984
07	Other cotton fabrics, not ornamented (111-182)	Sq. yds.	36,126,341	6,648,712
	MADE-UP GOODS OF BROAD-WOVEN FABRICS		.....	1,493,123
09	Pillowcases, plain (205-210)	No.	611,654	102,888
11	Dish towels, not jacquard-figured, not terry woven (215-220)	No.	452,328	23,707
13	Handkerchiefs, whether or not ornamented, etc. (223-230)	Doz.	451,183	656,266
15	Table damasks and manufactures of (235)	Lb.	387,672	444,841
17	Other manufactures of broad-woven fabrics (292-392)	Lb.	411,023	265,421
	APPAREL NOT KNIT OR CROCHETED		.....	9,263,894
19	Blouse and blouse and skirt sets, not knit or crocheted (400-420)	Doz.[1]	374,694	1,766,933
21	Sport shirts, not knit or crocheted (425-450)	Doz.	134,930	736,261

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Imports of Cotton, Statistics, Report FT 130, March 1960. Washington 25, D. C. July, 1960.

For sale by the Bureau of the Census, Washington 25, D. C. Price 10 cents (single copy). Subscription price: $1.

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports covered by informal entries or individually valued less than $100 and reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country.(Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

VERIFICATION OF THE DATA ON A 10 PERCENT BASIS BEGINNING OCTOBER 1957

For the months of July-September 1957 an attempt was made to obtain verification from Customs officials for data on all cotton manufactures, and about 90 percent of the total value of the data shown in imports for those months was verified by Customs officials prior to publication of the data. Beginning with imports for the month of October this verification procedure has been limited to a 10 percent sample of cotton import shipments. This change in procedure was based on the assumption that by October, importers would be able to report their imports in reasonably accurate terms, since they would have had three months in which to become familiar with the new commodity classifications. The verification of the 10 percent sample for October, and subsequent months has two purposes: (1) errors made by importers and found in this 10 percent sample are being called to the attention of the importers so that they will not make similar errors on future importations; (2) the 10 percent sample gives some information as to the accuracy of classification of total imports as reported by the importer.

ANALYSIS OF THE 10 PERCENT VERIFICATION

In view of the limited number of items in the universe (and in the sample) for many of the individual commodity classifications, the 10 percent verification provides more information as to the degree of reliability on a cumulative basis than on a monthly basis.

Based on a 10 percent sample for the period October 1957-November 1959, it appears that classifications for about three percent of the importations have been declared incorrectly by importers. However, since the average value of the shipments reported incorrectly during this period was about 25 percent lower than the average value of all cotton manufactures, the value of the imported cotton manufactures reported incorrectly in the statistics is expected to be somewhat less than three percent of the total. It should be noted that the effect of the errors on figures for individual commodities or commodity groupings may actually be greater than the dollar value of the errors themselves, since one error frequently means that one of the commodities or groupings is overcounted, and another is correspondingly undercounted. On the other hand there is, of course some cancellation of errors in the figures for individual classifications.

Of the 20 commodity groupings shown on page 5 of this report, two (11 and 23) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the sample. For commodity grouping 11 there were 2 errors out of 35 in the sample and for commodity grouping 23, 6 out of 110. For the other eighteen, there were either no errors found in the sample of 20 or more, or errors were found in a ratio of less than 1 out of 20.

Of the 114 individual commodity classifications under which cotton manufactures have been reported during the period October 1957-November 1959, the following 64 had 20 or more items in the sample.

021	161	227	415	523	632	722
042	162	230	420	527	642	742
105	171	235	425	535	652	752
107	172	302	440	545	672	762
109	181	312	445	549	682	872
111	182	332	455	552	692	882
121	205	362	503	562	700	892
122	220	400	505	572	705	905
152	223	405	520	622	712	910
						915

Fifteen of the above 64 classifications (223, 312, 362, 420, 520, 523, 572, 632, 672, 682, 712, 722, 872, 882, and 892) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the sample. For commodity number 223, there were 8 errors out of 97 in the sample; for commodity number 312, 3 out of 37; for commodity number 362, 2 out of 23; for commodity number 420, 3 out of 58; for commodity number 520, 2 out of 28; for commodity number 523, 4 out of 58; for commodity number 572, 7 out of 59; for commodity number 632, 6 out of 98; for commodity number 672, 8 out of 44; for commodity number 682, 9 out of 38; for commodity number 712, 3 out of 57; for commodity number 722, 7 out of 65; for commodity 872, 5 out of 26; for commodity number 882, 2 out of 36; and for commodity number 892, 4 out of 39. For the other 49, there were either no errors found in the sample of 20 or more, or errors were found in a ratio of less than 1 out of 20. The value overcounting or undercounting for any individual commodity or commodity grouping might of course be higher or lower than the item overcounting or undercounting, although on the average it could be expected to be somewhat lower since the average value for errors was lower than the average value for non-error shipments.

The comparison of error items found to total items in the sample for commodity groupings or commodities with less than 20 in the sample is not particularly meaningful. Information on the results of the sample verification will continue to be shown on a cumulative basis, beginning with results for the October 1957 data, in subsequent issues of Report FT 130. Information on the proportion of items in error will then be shown for additional commodities as the cumulative sample reaches 20 for each of them.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES, BY GROUPINGS OF COMMODITIES

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Imports of Cotton, Statistics, Report FT 130, April, 1960. Washington 25, D. C. July, 1960.

For sale by the Bureau of the Census, Washington 25, D. C. Price 10 cents (single copy). Subscription price: $1.

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports covered by informal entries or individually valued less than $100 and reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country.(Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

VERIFICATION OF THE DATA ON A 10 PERCENT BASIS BEGINNING OCTOBER 1957

For the months of July-September 1957 an attempt was made to obtain verification from Customs officials for data on all cotton manufactures, and about 90 percent of the total value of the data shown in imports for those months was verified by Customs officials prior to publication of the data. Beginning with imports for the month of October this verification procedure has been limited to a 10 percent sample of cotton import shipments. This change in procedure was based on the assumption that by October, importers would be able to report their imports in reasonably accurate terms, since they would have had three months in which to become familiar with the new commodity classifications. The verification of the 10 percent sample for October and subsequent months has two purposes: (1) errors made by importers and found in this 10 percent sample are being called to the attention of the importers so that they will not make similar errors on future importations; (2) the 10 percent sample gives some information as to the accuracy of classification of total imports as reported by the importer.

ANALYSIS OF THE 10 PERCENT VERIFICATION

In view of the limited number of items in the universe (and in the sample) for many of the individual commodity classifications, the 10 percent verification provides more information as to the degree of reliability on a cumulative basis than on a monthly basis.

Based on a 10 percent sample for the period October 1957-December 1959, it appears that classifications for about three percent of the importations have been declared incorrectly by importers. However, since the average value of the shipments reported incorrectly during this period was about 25 percent lower than the average value of all cotton manufactures, the value of the imported cotton manufactures reported incorrectly in the statistics is expected to be somewhat less than three percent of the total. It should be noted that the effect of the errors on figures for indiviudal commodities or commodity groupings may actually be greater than the dollar value of the errors themselves, since one error frequently means that one of the commodities or groupings is overcounted, and another is correspondingly undercounted. On the other hand there is, of course some cancellation of errors in the figures for individual classifications.

Of the 20 commodity groupings shown on page 5 of this report, one (11) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the sample. For this commodity grouping there were 2 errors out of 35 in the sample. For the other nineteen, there were either no errors found in the sample of 20 or more, or errors were found in a ratio of less than 1 out of 20.

Of the 114 individual commodity classifications under which cotton manufactures have been reported during the period October 1957-December 1959, the following 69 had 20 or more items in the sample.

021	152	227	405	520	632	742
042	161	230	415	523	642	752
105	162	235	420	527	652	762
107	171	302	425	535	672	872
109	172	312	440	545	682	882
111	181	322	445	549	692	892
112	182	332	455	552	700	905
121	205	342	503	562	705	910
122	220	362	505	572	712	915
141	223	400	510	622	722	

Eighteen of the above 69 classifications (112, 223, 302, 312, 362, 415, 420, 520, 523, 572, 632, 672, 682, 712, 722, 872, 882, and 892) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the sample. For commodity number 112, there was 1 error out of 20 in the sample; for commodity number 223, 8 out of 100; for commodity number 302, 2 out of 30; for commodity number 312, 3 out of 38; for commodity number 362, 3 out of 28; for commodity number 415, 5 out of 88; for commodity number 420, 3 out of 59; for commodity number 520, 2 out of 30; for commodity number 523, 4 out of 62; for commodity number 572, 6 out of 64; for commodity number 632, 8 out of 100; for commodity number 672, 8 out of 45; for commodity number 682, 9 out of 38; for commodity number 712, 3 out of 58; for commodity number 722, 7 out of 70; for commodity number 872, 5 out of 28; for commodity number 882, 2 out of 38; and for commodity number 892, 4 out of 39. For the other 51, there were either no errors found in the sample of 20 or more, or errors were found in a ratio of less than 1 out of 20. The value overcounting or undercounting for any individual commodity or commodity grouping might of course be higher or lower than the item overcounting or undercounting, although on the average it could be expected to be somewhat lower since the average value for errors was lower than the average value for non-error shipments.

The comparison of error items found to total items in the sample for commodity groupings or commodities with less than 20 in the sample is not particularly meaningful. Information on the results of the sample verification will continue to be shown on a cumulative basis, beginning with results for the October 1957 data, in subsequent issues of Report FT 130. Information on the proportion of items in error will then be shown for additional commodity groupings and commodities as the cumulative sample reaches 20 for each of them.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES, BY GROUPINGS OF COMMODITIES

Commodity grouping number	Commodity grouping description and unit of quantity (and commodity numbers included in the commodity grouping)		Quantity	Value (dollars)

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Imports of Cotton, Statistics, Report FT 130, May, 1960. Washington 25, D. C. August, 1960.

For sale by the Bureau of the Census, Washington 25, D. C. Price 10 cents (single copy). Subscription price: $1.

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports covered by informal entries or individually valued less than $100 and reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country.(Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

VERIFICATION OF THE DATA ON A 10 PERCENT BASIS BEGINNING OCTOBER 1957

For the months of July-September 1957 an attempt was made to obtain verification from Customs officials for data on all cotton manufactures, and about 90 percent of the total value of the data shown in imports for those months was verified by Customs officials prior to publication of the data. Beginning with imports for the month of October this verification procedure has been limited to a 10 percent sample of cotton import shipments. This change in procedure was based on the assumption that by October, importers would be able to report their imports in reasonably accurate terms, since they would have had three months in which to become familiar with the new commodity classifications. The verification of the 10 percent sample for October and subsequent months has two purposes: (1) errors made by importers and found in this 10 percent sample are being called to the attention of the importers so that they will not make similar errors on future importations; (2) the 10 percent sample gives some information as to the accuracy of classification of total imports as reported by the importer.

ANALYSIS OF THE 10 PERCENT VERIFICATION

In view of the limited number of items in the universe (and in the sample) for many of the individual commodity classifications, the 10 percent verification provides more information as to the degree of reliability on a cumulative basis than on a monthly basis.

Based on a 10 percent sample for the period October 1957-January 1960, it appears that classifications for about three percent of the importations have been declared incorrectly by importers. However, since the average value of the shipments reported incorrectly during this period was about 25 percent lower than the average value of all cotton manufactures, the value of the imported cotton manufactures reported incorrectly in the statistics is expected to be somewhat less than three percent of the total. It should be noted that the effect of the errors on figures for individual commodities or commodity groupings may actually be greater than the dollar value of the errors themselves, since one error frequently means that one of the commodities or groupings is overcounted, and another is correspondingly undercounted. On the other hand there is, of course some cancellation of errors in the figures for individual classifications.

Of the 20 commodity groupings shown on page 5 of this report, two (11 and 33) had net overcounting or undercounting in a ratio in as much as 1 out of 20 in the sample. For commodity grouping 11 there were 2 errors out of 36 in the sample. and for commodity grouping 33, 6 errors out of 61 in the sample. For the other 18 there were either no errors found in the sample of 20 or more, or errors were found in the ratio of less than 1 out of 20.

Of the 114 individual commodity classifications under which cotton manufactures have been reported during the period October 1957-January 1960, the following 69 had 20 or more items in the sample.

021	152	227	405	520	632	742
042	161	230	415	523	642	752
105	162	235	420	527	652	762
107	171	302	425	535	672	872
109	172	312	440	545	682	882
111	181	322	445	549	692	892
112	182	332	455	552	700	905
121	205	342	503	562	705	910
122	220	362	505	572	712	915
141	223	400	510	622	722	

Sixteen of the above 69 classifications (223, 302, 312, 362, 415, 520, 572, 632, 672, 682, 700, 712, 722, 872, 882, and 892) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the sample. For commodity number 223, there were 8 errors out of 105 in the sample; for commodity number 302, 2 out of 30; for commodity number 312, 3 out of 38; for commodity number 362, 3 out of 32; for commodity number 415, 5 out of 89; for commodity number 520, 2 out of 30; for commodity number 572, 6 out of 66; for commodity number 632, 8 out of 107; for commodity number 672, 8 out of 48; for commodity number 682, 10 out of 39; for commodity number 700, 6 out of 61; for commodity number 712, 3 out of 59; for commodity number 722, 11 out of 77; for commodity number 872, 5 out of 28; for commodity number 882, 2 out of 39; and for commodity number 892, 4 out of 39. For the other 53, there were either no errors found in the sample of 20 or more, or errors were found in a ratio of less than 1 out of 20. The value overcounting or undercounting for any individual commodity or commodity grouping might of course be higher or lower than the item overcounting or undercounting, although on the average it could be expected to be somewhat lower since the average value for errors was lower than the average value for non-error shipments.

The comparison of error items found to total items in the sample for commodity groupings or commodities with less than 20 in the sample is not particularly meaningful. Information on the results of the sample verification will continue to be shown on a cumulative basis, beginning with results for the October 1957 data, in subsequent issues of Report FT 130. Information on the proportion of items in error will then be shown for additional commodity groupings and commodities as the cumulative sample reaches 20 for each of them.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES, BY GROUPINGS OF COMMODITIES

Commodity grouping number	Commodity grouping description and unit of quantity (and commodity numbers included in the commodity grouping)		Quantity	Value (dollars)
	TOTAL IMPORTS		.....	21,865,796

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Imports of Cotton, Statistics, Report FT 130, June 1960. Washington 25, D. C. September 1960.

For sale by the Bureau of the Census, Washington 25, D. C. Price 10 cents (single copy). Subscription price: $1.

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports covered by informal entries or individually valued less than $100 and reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

VERIFICATION OF THE DATA ON A 10 PERCENT BASIS BEGINNING OCTOBER 1957

For the months of July-September 1957 an attempt was made to obtain verification from Customs officials for data on all cotton manufactures, and about 90 percent of the total value of the data shown in imports for those months was verified by Customs officials prior to publication of the data. Beginning with imports for the month of October this verification procedure has been limited to a 10 percent sample of cotton import shipments. This change in procedure was based on the assumption that by October, importers would be able to report their imports in reasonably accurate terms, since they would have had three months in which to become familiar with the new commodity classifications. The verification of the 10 percent sample for October and subsequent months has two purposes: (1) errors made by importers and found in this 10 percent sample are being called to the attention of the importers so that they will not make similar errors on future importations; (2) the 10 percent sample gives some information as to the accuracy of classification of total imports as reported by the importer.

ANALYSIS OF THE 10 PERCENT VERIFICATION

In view of the limited number of items in the universe (and in the sample) for many of the individual commodity classifications, the 10 percent verification provides more information as to the degree of reliability on a cumulative basis than on a monthly basis.

Based on a 10 percent sample for the period October 1957-February 1960, it appears that classifications for about three percent of the importations have been declared incorrectly by importers. However, since the average value of the shipments reported incorrectly during this period was about 25 percent lower than the average value of all cotton manufactures, the value of the imported cotton manufactures reported incorrectly in the statistics is expected to be somewhat less than three percent of the total. It should be noted that the effect of the errors on figures for individual commodities or commodity groupings may actually be greater than the dollar value of the errors themselves, since one error frequently means that one of the commodities or groupings is overcounted, and another is correspondingly undercounted. On the other hand there is, of course some cancellation of errors in the figures for individual classifications.

Of the 20 commodity groupings shown on page 5 of this report, two (11 and 33) had net overcounting or undercounting in a ratio in as much as 1 out of 20 in the sample. For commodity grouping 11 there were 2 errors out of 36 in the sample, and for commodity grouping 33, 6 errors out of 67 in the sample. For the other 18 there were either no errors found in the sample of 20 or more, or errors were found in the ratio of less than 1 out of 20.

Of the 114 individual commodity classifications under which cotton manufactures have been reported during the period October 1957-February 1960, the following 69 had 20 or more items in the sample.

021	152	227	405	520	632	742
042	161	230	415	523	642	752
105	162	235	420	527	652	762
107	171	302	425	535	672	872
109	172	312	440	545	682	882
111	181	322	445	549	692	892
112	182	332	455	552	700	905
121	205	342	503	562	705	910
122	220	362	505	572	712	915
141	223	400	510	622	722	

Eighteen of the above 69 classifications (121, 223, 302, 312, 362, 420, 445, 520, 527, 572, 632, 672, 682, 700, 722, 872, 882, and 892) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the sample. For commodity number 121, there were 9 errors out of 116 in the sample; for commodity number 223, 8 out of 116; for commodity number 302, 2 out of 30; for commodity number 312, 3 out of 38; for commodity number 362, 3 out of 32; for commodity number 420, 5 out of 65; for commodity number 445, 6 out of 94; for commodity number 520, 4 out of 30; for commodity number 527, 4 out of 44; for commodity number 572, 6 out of 68; for commodity number 632, 8 out of 115; for commodity number 672, 8 out of 49; for commodity number 682, 10 out of 39; for commodity number 700, 6 out of 67; for commodity number 722, 11 out of 78; for commodity number 872, 5 out of 29; for commodity number 882, 2 out of 39; and for commodity number 892, 4 out of 39. For the other 51, there were either no errors found in the sample of 20 or more, or errors were found in a ratio of less than 1 out 20. The value overcounting or undercounting for any individual commodity or commodity grouping might of course be higher or lower than the item overcounting or undercounting, although on the average it could be expected to be somewhat lower since the average value for errors was lower than the average value for non-error shipments.

The comparison of error items found to total items in the sample for commodity groupings or commodities with less than 20 in the sample is not particularly meaningful. Information on the results of the sample verification will continue to be shown on a cumulative basis, beginning with results for the October 1957 data, in subsequent issues of Report FT 130. Information on the proportion of items in error will then be shown for additional commodity groupings and commodities as the cumulative sample reaches 20 for each of them.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES, BY GROUPINGS OF COMMODITIES

Commodity grouping number	Commodity grouping description and unit of quantity (and commodity numbers included in the commodity grouping)		Quantity	Value (dollars)
	TOTAL IMPORTS		.....	25,530,980
	COTTON YARN AND CLOTH		.....	10,243,728
01	Cotton yarn (011-042)	Lb.	1,473,918	722,988
03	Ginghams (105-107)	Sq. yds.	6,237,997	1,435,320
05	Velveteens in the piece, cut or uncut (108-109)	Sq. yds.	310,454	240,447
07	Other cotton fabrics, not ornamented (111-182)	Sq. yds.	44,930,963	7,844,973
	MADE-UP GOODS OF BROAD-WOVEN FABRICS		.....	1,322,578
09	Pillowcases, plain (205-210)	No.	373,135	72,455
11	Dish towels, not jacquard-figured, not terry woven (215-220)	No.	415,692	22,929
13	Handkerchiefs, whether or not ornamented, etc. (223-230)	Doz.	386,316	514,046
15	Table damasks and manufactures of (235)	Lb.	291,570	370,516
17	Other manufactures of broad-woven fabrics (292-392)	Lb.	553,497	342,632
	APPAREL NOT KNIT OR CROCHETED		.....	9,788,953
19	Blouse and blouse and skirt sets, not knit or crocheted (400-420)	Doz.[1]	279,618	1,497,154

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Imports of Cotton, Statistics, Report FT 130, July 1960. Washington 25, D. C. October 1960.

For sale by the Bureau of the Census, Washington 25, D. C. Price 10 cents (single copy). Subscription price: $1.

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports covered by informal entries or individually valued less than $100 and reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

VERIFICATION OF THE DATA ON A 10 PERCENT BASIS BEGINNING OCTOBER 1957

For the months of July-September 1957 an attempt was made to obtain verification from Customs officials for data on all cotton manufactures, and about 90 percent of the total value of the data shown in imports for those months was verified by Customs officials prior to publication of the data. Beginning with imports for the month of October this verification procedure has been limited to a 10 percent sample of cotton import shipments. This change in procedure was based on the assumption that by October, importers would be able to report their imports in reasonably accurate terms, since they would have had three months in which to become familiar with the new commodity classifications. The verification of the 10 percent sample for October and subsequent months has two purposes: (1) errors made by importers and found in this 10 percent sample are being called to the attention of the importers so that they will not make similar errors on future importations; (2) the 10 percent sample gives some information as to the accuracy of classification of total imports as reported by the importer.

ANALYSIS OF THE 10 PERCENT VERIFICATION

In view of the limited number of items in the universe (and in the sample) for many of the individual commodity classifications, the 10 percent verification provides more information as to the degree of reliability on a cumulative basis than on a monthly basis.

Based on a 10 percent sample for the period October 1957-March 1960, it appears that classifications for about three percent of the importations have been declared incorrectly by importers. However, since the average value of the shipments reported incorrectly during this period was about 25 percent lower than the average value of all cotton manufactures, the value of the imported cotton manufactures reported incorrectly in the statistics is expected to be somewhat less than three percent of the total. It should be noted that the effect of the errors on figures for individual commodities or commodity groupings may actually be greater than the dollar value of the errors themselves, since one error frequently means that one of the commodities or groupings is overcounted, and another is correspondingly undercounted. On the other hand there is, of course some cancellation of errors in the figures for individual classifications.

Of the 20 commodity groupings shown on page 5 of this report, two (11 and 33) had net overcounting or undercounting in a ratio in as much as 1 out of 20 in the sample. For commodity grouping 11 there were 2 errors out of 38 in the sample, and for commodity grouping 33, 6 errors out of 69 in the sample. For the other 18 there were either no errors found in the sample of 20 or more, or errors were found in the ratio of less than 1 out of 20.

Of the 114 individual commodity classifications under which cotton manufactures have been reported during the period October 1957-March 1960, the following 71 had 20 or more items in the sample.

011	141	223	400	510	622	722
021	152	227	405	520	632	742
032	161	230	415	523	642	752
042	162	235	420	527	652	762
105	171	302	425	535	672	872
107	172	312	440	545	682	882
109	181	322	445	549	692	892
111	182	332	455	552	700	905
112	205	342	503	562	705	910
121	220	362	505	572	712	915
122						

Nineteen of the above 71 classifications (011, 032, 121, 223, 302, 312, 362, 420, 445, 520, 527, 572, 632, 672, 682, 700, 722, 872, and 892) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the sample. For commodity number 011, there were 2 errors out of 25 in the sample, for commodity number 032, 2 out of 20; for commodity number 121, 9 out of 121; for commodity number 223, 8 out of 125; for commodity number 302, 2 out of 30; for commodity number 312, 3 out of 39; for commodity number 362, 3 out of 32; for commodity number 420, 5 out of 68; for commodity number 445, 6 out of 98; for commodity number 520, 4 out of 32; for commodity number 527, 5 out of 48; for commodity number 572, 6 out of 72; for commodity number 632, 8 out of 125; for commodity number 672, 6 out of 59; for commodity number 682, 9 out of 40; for commodity number 700, 6 out of 69; for commodity number 722, 11 out of 79; for commodity number 872, 5 out of 29; and for commodity number 892, 4 out of 39. For the other 52, there were either no errors found in the sample of 20 or more, or errors were found in a ratio of less than 1 out of 20. The value overcounting or undercounting for any individual commodity or commodity grouping might of course be higher or lower than the item overcounting or undercounting, although on the average it could be expected to be somewhat lower since the average value for errors was lower than the average value for non-error shipments.

The comparison of error items found to total items in the sample for commodity groupings or commodities with less than 20 in the sample is not particularly meaningful. Information on the results of the sample verification will continue to be shown on a cumulative basis, beginning with results for the October 1957 data, in subsequent issues of Report FT 130. Information on the proportion of items in error will then be shown for additional commodities as the cumulative sample reaches 20 for each of them.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES, BY GROUPINGS OF COMMODITIES

Commodity grouping number	Commodity grouping description and unit of quantity (and commodity numbers included in the commodity grouping)		Quantity	Value (dollars)
	TOTAL IMPORTS		.....	24,792,669
	COTTON YARN AND CLOTH		.....	8,307,582
01	Cotton yarn (011-042)	Lb.	1,351,302	641,288
03	Ginghams (105-107)	Sq. yds.	5,491,362	1,236,127
05	Velveteens in the piece, cut or uncut (108-109)	Sq. yds.	247,426	197,884
07	Other cotton fabrics, not ornamented (111-182)	Sq. yds.	34,514,437	6,232,283
	MADE-UP GOODS OF BROAD-WOVEN FABRICS		.....	1,778,477
09	Pillowcases, plain (205-210)	No.	260,636	55,559
11	Dish towels, not jacquard-figured, not terry woven (215-220)	No.	630,012	27,732
13	Handkerchiefs, whether or not ornamented, etc. (225-230)	Doz.	666,807	1,048,584
15	Table damasks and manufactures of (235)	Lb.	258,964	327,442
17	Other manufactures of broad-woven fabrics (292-392)	Lb.	455,793	319,160
	APPAREL NOT KNIT OR CROCHETED		.....	10,747,190

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Imports of Cotton, Statistics, Report FT 130, August, 1960. Washington 25, D. C. November, 1960.

For sale by the Bureau of the Census, Washington 25, D. C. Price 10 cents (single copy). Subscription price: $1.

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports covered by informal entries or individually valued less than $100 and reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country.(Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

VERIFICATION OF THE DATA ON A 10 PERCENT BASIS BEGINNING OCTOBER 1957

For the months of July-September 1957 an attempt was made to obtain verification from Customs officials for data on all cotton manufactures, and about 90 percent of the total value of the data shown in imports for those months was verified by Customs officials prior to publication of the data. Beginning with imports for the month of October this verification procedure has been limited to a 10 percent sample of cotton import shipments. This change in procedure was based on the assumption that by October, importers would be able to report their imports in reasonably accurate terms, since they would have had three months in which to become familiar with the new commodity classifications. The verification of the 10 percent sample for October and subsequent months has two purposes: (1) errors made by importers and found in this 10 percent sample are being called to the attention of the importers so that they will not make similar errors on future importations; (2) the 10 percent sample gives some information as to the accuracy of classification of total imports as reported by the importer.

ANALYSIS OF THE 10 PERCENT VERIFICATION

In view of the limited number of items in the universe (and in the sample) for many of the individual commodity classifications, the 10 percent verification provides more information as to the degree of reliability on a cumulative basis than on a monthly basis.

Based on a 10 percent sample for the period October 1957-April 1960, it appears that classifications for about three percent of the importations have been declared incorrectly by importers. However, since the average value of the shipments reported incorrectly during this period was about 20 percent lower than the average value of all cotton manufactures, the value of the imported cotton manufactures reported incorrectly in the statistics is expected to be somewhat less than three percent of the total. It should be noted that the effect of the errors on figures for individual commodities or commodity groupings may actually be greater than the dollar value of the errors themselves, since one error frequently means that one of the commodities or groupings is overcounted, and another is correspondingly undercounted. On the other hand there is, of course some cancellation of errors in the figures for individual classifications.

Of the 20 commodity groupings shown on page 5 of this report, two (11 and 33) had net overcounting or undercounting in a ratio in as much as 1 out of 20 in the sample. For commodity grouping 11 there were 2 errors out of 40 in the sample, and for commodity grouping 33, 6 errors out of 74 in the sample. For the other 18 there were either no errors found in the sample of 20 or more, or errors were found in the ratio of less than 1 out of 20.

Of the 114 individual commodity classifications under which cotton manufactures have been reported during the period October 1957-April 1960, the following 71 had 20 or more items in the sample.

011	141	223	400	510	622	722
021	152	227	405	520	632	742
032	161	230	415	523	642	752
042	162	235	420	527	652	762
105	171	302	425	535	672	872
107	172	312	440	545	682	882
109	181	322	445	549	692	892
111	182	332	455	552	700	905
112	205	342	503	562	705	910
121	220	362	505	572	712	915
122						

Nineteen of the above 71 classifications (011, 032, 121, 223, 302, 312, 362, 420, 445, 520, 527, 572, 632, 672, 682, 700, 722, 872, and 892) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the sample. For commodity number 011, there were 4 errors out of 31 in the sample, for commodity number 032, 3 out of 22; for commodity number 121, 10 out of 123; for commodity number 223, 8 out of 127; for commodity number 302, 2 out of 30; for commodity number 312, 3 out of 39; for commodity number 362, 3 out of 32; for commodity number 420, 5 out of 71; for commodity number 445, 13 out of 110; for commodity number 520, 4 out of 32; for commodity number 527, 5 out of 48; for commodity number 572, 5 out of 76; for commodity number 632, 7 out of 137; for commodity number 672, 4 out of 62; for commodity number 682, 9 out of 40; for commodity number 700, 6 out of 74; for commodity number 722, 11 out of 83; for commodity number 872, 5 out of 29; and for commodity number 892, 4 out of 40. For the other 52, there were either no errors found in the sample of 20 or more, or errors were found in a ratio of less than 1 out of 20. The value overcounting or undercounting for any individual commodity or commodity grouping might of course be higher or lower than the item overcounting or undercounting, although on the average it could be expected to be somewhat lower since the average value for errors was lower than the average value for non-error shipments.

The comparison of error items found to total items in the sample for commodity groupings or commodities with less than 20 in the sample is not particularly meaningful. Information on the results of the sample verification will continue to be shown on a cumulative basis, beginning with results for the October 1957 data, in subsequent issues of Report FT 130. Information on the proportion of items in error will then be shown for additional commodities as the cumulative sample reaches 20 for each of them.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES, BY GROUPINGS OF COMMODITIES

Commodity grouping number	Commodity grouping description and unit of quantity (and commodity numbers included in the commodity grouping)		Quantity	Value (dollars)
	TOTAL IMPORTS		.....	26,354,078
	COTTON YARN AND CLOTH		.....	8,553,084
01	Cotton yarn (011-042)	Lb.	1,889,327	966,363
03	Ginghams (105-107)	Sq. yds.	5,065,338	1,082,960
05	Velveteens in the piece, cut or uncut (108-109)	Sq. yds.	324,687	259,470
07	Other cotton fabrics, not ornamented (111-182)	Sq. yds.	33,860,061	6,244,291
	MADE-UP GOODS OF BROAD-WOVEN FABRICS		.....	1,821,372
09	Pillowcases, plain (205-210)	No.	314,622	70,071
11	Dish towels, not jacquard-figured, not terry woven (215-220)	No.	613,741	42,696
13	Handkerchiefs, whether or not ornamented, etc. (223-230)	Doz.	549,128	850,308
15	Table damasks and manufactures of (235)	Lb.	419,699	541,236
17	Other manufactures of broad-woven fabrics (292-392)	Lb.	489,108	317,061
	APPAREL NOT KNIT OR CROCHETED		.....	11,405,854
19	Blouse and blouse and skirt sets, not knit or crocheted (400-420)	Doz.[1]	304,470	1,606,774
21	Sport shirts, not knit or crocheted (425-450)	Doz.	201,864	1,409,543
23	Dress and work shirts (455-499)	Doz.	68,358	562,608
25	Body-supporting garments (503-505)	Doz.	178,814	448,176
27	Trousers, slacks and shorts (outer) except as part of blouse and short or blouse and trouser sets, not ornamented, etc. (510-545)	Doz.	293,850	2,811,854
29	Blouse and short; blouse and trouser sets; or blouse, short and skirt sets, whether or not ornamented, etc. (549)	Doz. sets.	15,452	178,922

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Imports of Cotton, Statistics, Report FT 130, September, 1960. Washington 25, D. C. December, 1960.

For sale by the Bureau of the Census, Washington 25, D. C. Price 10 cents (single copy). Subscription price: $1.

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports covered by informal entries or individually valued less than $100 and reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country.(Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

VERIFICATION OF THE DATA ON A 10 PERCENT BASIS BEGINNING OCTOBER 1957

For the months of July-September 1957 an attempt was made to obtain verification from Customs officials for data on all cotton manufactures, and about 90 percent of the total value of the data shown in imports for those months was verified by Customs officials prior to publication of the data. Beginning with imports for the month of October this verification procedure has been limited to a 10 percent sample of cotton import shipments. This change in procedure was based on the assumption that by October, importers would be able to report their imports in reasonably accurate terms, since they would have had three months in which to become familiar with the new commodity classifications. The verification of the 10 percent sample for October and subsequent months has two purposes: (1) errors made by importers and found in this 10 percent sample are being called to the attention of the importers so that they will not make similar errors on future importations; (2) the 10 percent sample gives some information as to the accuracy of classification of total imports as reported by the importer.

ANALYSIS OF THE 10 PERCENT VERIFICATION

In view of the limited number of items in the universe (and in the sample) for many of the individual commodity classifications, the 10 percent verification provides more information as to the degree of reliability on a cumulative basis than on a monthly basis.

Based on a 10 percent sample for the period October 1957-May 1960, it appears that classifications for about three percent of the importations have been declared incorrectly by importers. However, since the average value of the shipments reported incorrectly during this period was about 25 percent lower than the average value of all cotton manufactures, the value of the imported cotton manufactures reported incorrectly in the statistics is expected to be somewhat less than three percent of the total. It should be noted that the effect of the errors on figures for individual commodities or commodity groupings may actually be greater than the dollar value of the errors themselves, since one error frequently means that one of the commodities or groupings is overcounted, and another is correspondingly undercounted. On the other hand there is, of course some cancellation of errors in the figures for individual classifications.

Of the 20 commodity groupings shown on page 5 of this report, one (33) had net overcounting or undercounting in a ratio in as much as 1 out of 20 in the sample. For this commodity grouping there were 6 errors out of 80 in the sample. For the other 19 there were either no errors found in the sample of 20 or more, or errors were found in the ratio of less than 1 out of 20.

Of the 114 individual commodity classifications under which cotton manufactures have been reported during the period October 1957-May 1960, the following 71 had 20 or more items in the sample.

011	141	223	400	510	622	722
021	152	227	405	520	632	742
032	161	230	415	523	642	752
042	162	235	420	527	652	762
105	171	302	425	535	672	872
107	172	312	440	545	682	882
109	181	322	445	549	692	892
111	182	332	455	552	700	905
112	205	342	503	562	705	910
121	220	362	505	572	712	915
122						

Eighteen of the above 71 classifications (011, 032, 121, 223, 302, 312, 362, 420, 445, 520, 527, 572, 672, 682, 700, 722, 872, and 892) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the sample. For commodity number 011, there were 4 errors out of 35 in the sample, for commodity number 032, 3 out of 22; for commodity number 121, 10 out of 128; for commodity number 223, 8 out of 157; for commodity number 302, 2 out of 30; for commodity number 312, 3 out of 40; for commodity number 362, 3 out of 33; for commodity number 420, 6 out of 74; for commodity number 445, 13 out of 116; for commodity number 520, 4 out of 33; for commodity number 527, 6 out of 55; for commodity number 572, 5 out of 87; for commodity number 672, 4 out of 68; for commodity number 682, 9 out of 40; for commodity number 700, 6 out of 80; for commodity number 722, 11 out of 88; for commodity number 872, 6 out of 32; and for commodity number 892, 4 out of 41. For the other 53, there were either no errors found in the sample of 20 or more, or errors were found in a ratio of less than 1 out of 20. The value overcounting or undercounting for any individual commodity or commodity grouping might of course be higher or lower than the item overcounting or undercounting, although on the average it could be expected to be somewhat lower since the average value for errors was lower than the average value of non-error shipments.

The comparison of error items found to total items in the sample for commodity groupings or commodities with less than 20 in the sample is not particularly meaningful. Information on the results of the sample verification will continue to be shown on a cumulative basis, beginning with results for the October 1957 data, in subsequent issues of Report FT 130. Information on the proportion of items in error will then be shown for additional commodities as the cumulative sample reaches 20 for each of them.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES, BY GROUPINGS OF COMMODITIES

SEPTEMBER 1960

Commodity grouping number	Commodity grouping description and unit of quantity (and commodity numbers included in the commodity grouping)		Quantity	Value (dollars)
	TOTAL IMPORTS		.....	22,965,953
	COTTON YARN AND CLOTH		.....	8,075,728
01	Cotton yarn (011-042)	Lb.	887,069	413,468
03	Ginghams (105-107)	Sq. yds.	4,457,001	962,520
05	Velveteens in the piece, cut or uncut (108-109)	Sq. yds.	261,126	221,213
07	Other cotton fabrics, not ornamented (111-182)	Sq. yds.	35,391,329	6,478,527
	MADE-UP GOODS OF BROAD-WOVEN FABRICS		.....	2,025,405
09	Pillowcases, plain (205-210)	No.	381,040	71,918
11	Dish towels, not jacquard-figured, not terry woven (215-220)	No.	377,696	17,964
13	Handkerchiefs, whether or not ornamented, etc.(223-230)	Doz.	751,955	1,168,653
15	Table damasks and manufactures of (235)	Lb.	307,245	364,953
17	Other manufactures of broad-woven fabrics (292-392)	Lb.	640,640	401,917
	APPAREL NOT KNIT OR CROCHETED		.....	8,630,704
19	Blouse and blouse and skirt sets, not knit or crocheted (400-420)	Doz.[1]	150,011	798,059
21	Sport shirts, not knit or crocheted (425-450)	Doz.	171,590	1,071,830
23	Dress and work shirts (455-499)	Doz.	40,991	380,997
25	Body-supporting garments (503-505)	Doz.	179,337	446,778
27	Trousers, slacks and shorts (outer) except as part of blouse and short or blouse and trouser sets, not ornamented, etc. (510-545)	Doz.	209,885	1,929,172
29	Blouse and short; blouse and trouser sets; or blouse, short and skirt sets, whether or not ornamented, etc. (549)	Doz. sets.	13,374	108,165
31	Other apparel not knit or crocheted (552-692)	Lb.	1,842,889	3,895,703
	KNIT GOODS		.....	1,306,446
33	Men's and boys' knit T-shirts (all white) not ornamented, etc. (700)	Doz.	32,496	53,607
35	Gloves and mittens, knit or crocheted, whether or not ornamented, etc. (705)	Doz. pr.	103,034	620,999
37	Other apparel and articles, knit or crocheted (712-892)	Lb.	455,564	631,840
	MISCELLANEOUS COTTON MANUFACTURES, N.E.S.		.....	2,927,670
39	Miscellaneous cotton manufactures, n.e.s. (905-915)		.....	2,927,670

[1]Blouse and skirt sets are in terms of dozen sets.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Imports of Cotton, Statistics, Report FT 130, October, 1960. Washington 25, D. C. January, 1961.

For sale by the Bureau of the Census, Washington 25, D. C. Price 10 cents (single copy). Subscription price: $1.

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports covered by informal entries or individually valued less than $100 and reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country.(Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

VERIFICATION OF THE DATA ON A 10 PERCENT BASIS BEGINNING OCTOBER 1957

For the months of July-September 1957 an attempt was made to obtain verification from Customs officials for data on all cotton manufactures, and about 90 percent of the total value of the data shown in imports for those months was verified by Customs officials prior to publication of the data. Beginning with imports for the month of October this verification procedure has been limited to a 10 percent sample of cotton import shipments. This change in procedure was based on the assumption that by October, importers would be able to report their imports in reasonably accurate terms, since they would have had three months in which to become familiar with the new commodity classifications. The verification of the 10 percent sample for October and subsequent months has two purposes: (1) errors made by importers and found in this 10 percent sample are being called to the attention of the importers so that they will not make similar errors on future importations; (2) the 10 percent sample gives some information as to the accuracy of classification of total imports as reported by the importer.

ANALYSIS OF THE 10 PERCENT VERIFICATION

In view of the limited number of items in the universe (and in the sample) for many of the individual commodity classifications, the 10 percent verification provides more information as to the degree of reliability on a cumulative basis than on a monthly basis.

Based on a 10 percent sample for the period October 1957 June 1960, it appears that classifications for about three percent of the importations have been declared incorrectly by importers. However, since the average value of the shipments reported incorrectly during this period was about 20 percent lower than the average value of all cotton manufactures, the value of the imported cotton manufactures reported incorrectly in the statistics is expected to be somewhat less than three percent of the total. It should be noted that the effect of the errors on figures for individual commodities or commodity groupings may actually be greater than the dollar value of the errors themselves, since one error frequently means that one of the commodities or groupings is overcounted, and another is correspondingly undercounted. On the other hand there is, of course some cancellation of errors in the figures for individual classifications.

Of the 20 commodity groupings shown on page 5 of this report, one (33) had net overcounting or undercounting in a ratio in as much as 1 out of 20 in the sample. For this commodity grouping there were 6 errors out of 82 in the sample. For the other 19 there were either no errors found in the sample of 20 or more, or errors were found in the ratio of less than 1 out of 20.

Of the 114 individual commodity classifications under which cotton manufactures have been reported during the period October 1957-June 1960, the following 71 had 20 or more items in the sample.

011	141	223	400	510	622	722
021	152	227	405	520	632	742
032	161	230	415	523	642	752
042	162	235	420	527	652	762
105	171	302	425	535	672	872
107	172	312	440	545	682	882
109	181	322	445	549	692	892
111	182	332	455	552	700	905
112	205	342	503	562	705	910
121	220	362	505	572	712	915
122						

Eighteen of the above 71 classifications (011, 032, 121, 302, 312, 362, 420, 445, 520, 527, 572, 632, 672, 682, 700, 722, 872, and 892) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the sample. For commodity number 011, there were 5 errors out of 40 in the sample, for commodity number 032, 4 out of 25; for commodity number 121, 10 out of 136; for commodity number 302, 2 out of 30; for commodity number 312, 3 out of 40; for commodity number 362, 3 out of 34; for commodity number 420, 7 out of 75; for commodity number 445, 14 out of 130; for commodity number 520, 4 out of 36; for commodity number 527, 6 out of 55; for commodity number 572, 5 out of 97; for commodity number 632, 8 out of 155; for commodity number 672, 4 out of 71; for commodity number 682, 9 out of 40; for commodity number 700, 6 out of 82; for commodity number 722, 11 out of 90; for commodity number 872, 6 out of 33; and for commodity number 892, 4 out of 41. For the other 53, there were either no errors found in the sample of 20 or more, or errors were found in a ratio of less than 1 out of 20. The value overcounting or undercounting for any individual commodity or commodity grouping might of course be higher or lower than the item overcounting or undercounting, although on the average it could be expected to be somewhat lower since the average value for errors was lower than the average value of non-error shipments.

The comparison of error items found to total items in the sample for commodity groupings or commodities with less than 20 in the sample is not particularly meaningful. Information on the results of the sample verification will continue to be shown on a cumulative basis, beginning with results for the October 1957 data, in subsequent issues of Report FT 130. Information on the proportion of items in error will then be shown for additional commodities as the cumulative sample reaches 20 for each of them.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES, BY GROUPINGS OF COMMODITIES

Commodity grouping number	Commodity grouping description and unit of quantity (and commodity numbers included in the commodity grouping)		Quantity	Value (dollars)
	TOTAL IMPORTS		.....	18,578,454
	COTTON YARN AND CLOTH		.....	6,910,563
01	Cotton yarn (011-042)	Lb.	1,369,692	703,071
03	Ginghams (105-107)	Sq. yds.	4,248,283	957,284
05	Velveteens in the piece, cut or uncut (108-109)	Sq. yds.	168,850	178,227
07	Other cotton fabrics, not ornamented (111-182)	Sq. yds.	23,250,924	5,071,981
	MADE-UP GOODS OF BROAD-WOVEN FABRICS		.....	2,131,957
09	Pillowcases, plain (205-210)	No.	447,336	87,327
11	Dish towels, not jacquard-figured, not terry woven (215-220)	No.	252,731	11,281
13	Handkerchiefs, whether or not ornamented, etc. (223-230)	Doz.	737,842	1,173,923
15	Table damasks and manufactures of (235)	Lb.	393,175	512,539

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Imports of Cotton, Statistics, Report FT 130, November, 1960. Washington 25, D. C. February, 1961.

For sale by the Bureau of the Census, Washington 25, D. C. Price 10 cents (single copy). Subscription price: $1.

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports covered by informal entries or individually valued less than $100 and reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country.(Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation. classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

VERIFICATION OF THE DATA ON A 10 PERCENT BASIS BEGINNING OCTOBER 1957

For the months of July-September 1957 an attempt was made to obtain verification from Customs officials for data on all cotton manufactures, and about 90 percent of the total value of the data shown in imports for those months was verified by Customs officials prior to publication of the data. Beginning with imports for the month of October this verification procedure has been limited to a 10 percent sample of cotton import shipments. This change in procedure was based on the assumption that by October, importers would be able to report their imports in reasonably accurate terms, since they would have had three months in which to become familiar with the new commodity classifications. The verification of the 10 percent sample for October and subsequent months has two purposes: (1) errors made by importers and found in this 10 percent sample are being called to the attention of the importers so that they will not make similar errors on future importations; (2) the 10 percent sample gives some information as to the accuracy of classification of total imports as reported by the importer.

ANALYSIS OF THE 10 PERCENT VERIFICATION

In view of the limited number of items in the universe (and in the sample) for many of the individual commodity classifications, the 10 percent verification provides more information as to the degree of reliability on a cumulative basis than on a monthly basis.

Based on a 10 percent sample for the period October 1957-July 1960, it appears that classifications for about three percent of the importations have been declared incorrectly by importers. However, since the average value of the shipments reported incorrectly during this period was about 20 percent lower than the average value of all cotton manufactures, the value of the imported cotton manufactures reported incorrectly in the statistics is expected to be somewhat less than three percent of the total. It should be noted that the effect of the errors on figures for individual commodities or commodity groupings may actually be greater than the dollar value of the errors themselves, since one error frequently means that one of the commodities or groupings is overcounted, and another is correspondingly undercounted. On the other hand there is, of course some cancellation of errors in the figures for individual classifications.

Of the 20 commodity groupings shown on page 5 of this report, one (33) had net overcounting or undercounting in a ratio in as much as 1 out of 20 in the sample. For this commodity grouping there were 6 errors out of 82 in the sample. For the other 19 there were either no errors found in the sample of 20 or more, or errors were found in the ratio of less than 1 out of 20.

Of the 114 individual commodity classifications under which cotton manufactures have been reported during the period October 1957-July 1960, the following 74 had 20 or more items in the sample.

121	210	362	505	572	712	915
122	220	400	510			

Twenty-two of the above 74 classifications (011, 021, 032, 121, 210, 302, 312, 362, 415, 420, 445, 470, 520, 527, 540, 572, 672, 682, 700, 722, 872, and 892) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the sample. For commodity number 011, there were 7 errors out of 48 in the sample, for commodity number 021, 3 out of 38; for commodity number 032, 3 out of 28; for commodity number 121, 10 out of 139; for commodity number 210, 1 out of 20; for commodity number 302, 2 out of 30; for commodity number 312, 3 out of 41; for commodity number 362, 3 out of 36; for commodity number 415, 6 out of 119; for commodity number 420, 7 out of 83; for commodity number 445, 15 out of 136; for commodity number 470, 2 out of 25; for commodity number 520, 4 out of 43; for commodity number 527, 6 out of 55; for commodity number 540, 1 out of 20; for commodity number 572, 5 out of 100; for commodity number 672, 4 out of 77; for commodity number 682, 10 out of 44; for commodity number 700, 6 out of 82; for commodity number 722, 10 out of 94; for commodity number 872, 6 out of 34; and for commodity number 892, 4 out of 41. For the other 52, there were either no errors found in the sample of 20 or more, or errors were found in a ratio of less than 1 out of 20. The value overcounting or undercounting for any individual commodity or commodity grouping might of course be higher or lower than the item overcounting or undercounting, although on the average it could be expected to be somewhat lower since the average value for errors was lower than the average value of non-error shipments.

The comparison of error items found to total items in the sample for commodity groupings or commodities with less than 20 in the sample is not particularly meaningful. Information on the results of the sample verification will continue to be shown on a cumulative basis, beginning with results for the October 1957 data, in subsequent issues of Report FT 130. Information on the proportion of items in error will then be shown for additional commodities as the cumulative sample reaches 20 for each of them.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES, BY GROUPINGS OF COMMODITIES

NOVEMBER 1960

Commodity grouping number	Commodity grouping description and unit of quantity (and commodity numbers included in the commodity grouping)		Quantity	Value (dollars)
	TOTAL IMPORTS		.....	18,405,339
	COTTON YARN AND CLOTH		.....	6,626,452
01	Cotton yarn (011-042)	Lb.	894,121	454,657
03	Ginghams (105-107)	Sq. yds.	4,324,228	949,542
05	Velveteens in the piece, cut or uncut (108-109)	Sq. yds.	273,291	280,982
07	Other cotton fabrics, not ornamented (111-182)	Sq. yds.	22,469,769	4,941,271
	MADE-UP GOODS OF BROAD-WOVEN FABRICS		.....	2,019,653
09	Pillowcases, plain (205-210)	No.	446,418	92,412
11	Dish towels, not jacquard-figured, not terry woven (215-220)	No.	241,471	14,899
13	Handkerchiefs, whether or not ornamented, etc. (223-230)	Doz.	651,945	959,488
15	Table damasks and manufactures of (235)	Lb.	473,291	590,505
17	Other manufactures of broad-woven fabrics (292-392)	Lb.	557,458	362,349
	APPAREL NOT KNIT OR CROCHETED		.....	5,821,504
19	Blouse and blouse and skirt sets, not knit or crocheted (400-420)	Doz.[1]	74,142	403,181
21	Sport shirts, not knit or crocheted (425-450)	Doz.	120,939	614,668
23	Dress and work shirts (455-499)	Doz.	37,936	401,742
25	Body-supporting garments (503-505)	Doz.	247,568	622,652
27	Trousers, slacks and shorts (outer) except as part of blouse and short or blouse and trouser sets, not ornamented, etc. (510-545)	Doz.	136,938	880,596
29	Blouse and short; blouse and trouser sets; or blouse, short and skirt sets, whether or not ornamented, etc. (549)	Doz. sets.	11,588	83,358
31	Other apparel not knit or crocheted (552-692)	Lb.	1,186,084	2,815,307
	KNIT GOODS		.....	1,142,292
33	Men's and boys' knit T-shirts (all white) not ornamented, etc. (700)	Doz.	29,632	54,440
35	Gloves and mittens, knit or crocheted, whether or not ornamented, etc. (705)	Doz. pr.	85,932	609,270
37	Other apparel and articles, knit or crocheted (712-892)	Lb.	255,267	478,582
	MISCELLANEOUS COTTON MANUFACTURES, N.E.S.		.....	2,795,438
39	Miscellaneous cotton manufactures, n.e.s. (905-915)		.....	2,795,438

[1]Blouse and skirt sets are in terms of dozen sets.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Imports of Cotton, Statistics, Report FT 130, December, 1960. Washington 25, D. C. March, 1961.

For sale by the Bureau of the Census, Washington 25, D. C. Price 10 cents (single copy). Subscription price: $1.

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports covered by informal entries or individually valued less than $100 and reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of these "low-value imports" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country.(Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

VERIFICATION OF THE DATA ON A 10 PERCENT BASIS BEGINNING OCTOBER 1957

For the months of July-September 1957 an attempt was made to obtain verification from Customs officials for data on all cotton manufactures, and about 90 percent of the total value of the data shown in imports for those months was verified by Customs officials prior to publication of the data. Beginning with imports for the month of October this verification procedure has been limited to a 10 percent sample of cotton import shipments. This change in procedure was based on the assumption that by October, importers would be able to report their imports in reasonably accurate terms, since they would have had three months in which to become familiar with the new commodity classifications. The verification of the 10 percent sample for October and subsequent months has two purposes: (1) errors made by importers and found in this 10 percent sample are being called to the attention of the importers so that they will not make similar errors on future importations; (2) the 10 percent sample gives some information as to the accuracy of classification of total imports as reported by the importer.

ANALYSIS OF THE 10 PERCENT VERIFICATION

In view of the limited number of items in the universe (and in the sample) for many of the individual commodity classifications, the 10 percent verification provides more information as to the degree of reliability on a cumulative basis than on a monthly basis.

Based on a 10 percent sample for the period October 1957-September 1960, it appears that classifications for about three percent of the importations have been declared incorrectly by importers. However, since the average value of the shipments reported incorrectly during this period was about 25 percent lower than the average value of all cotton manufactures, the value of the imported cotton manufactures reported incorrectly in the statistics is expected to be somewhat less than three percent of the total. It should be noted that the effect of the errors on figures for individual commodities or commodity groupings may actually be greater than the dollar value of the errors themselves, since one error frequently means that one of the commodities or groupings is overcounted, and another is correspondingly undercounted. On the other hand there is, of course some cancellation of errors in the figures for individual classifications.

Of the 20 commodity groupings shown on page 5 of this report, one (33) had net overcounting or undercounting in a ratio in as much as 1 out of 20 in the sample. For this commodity grouping there were 6 errors out of 88 in the sample. For the other 19 there were either no errors found in the sample of 20 or more, or errors were found in the ratio of less than 1 out of 20.

Of the 114 individual commodity classifications under which cotton manufactures have been reported during the period October 1957-September 1960, the following 75 had 20 or more items in the sample.

011	141	223	405	520	632	732
021	152	227	415	523	642	742
032	161	230	420	527	652	752
042	162	235	425	535	672	762
105	171	302	440	540	682	872
107	172	312	445	545	692	882
109	181	322	455	549	700	892
111	182	332	470	552	705	905
112	205	342	503	562	712	910
121	210	362	505	572	722	915
122	220	400	510	622		

Seventeen of the above 75 classifications (011, 021, 032, 121, 302, 312, 362, 420, 445, 470, 520, 527, 682, 700, 722, 872, and 892) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the sample. For commodity number 011, there were 7 errors out of 70 in the sample, for commodity number 021, 3 out of 41; for commodity number 032, 3 out of 29; for commodity number 121, 10 out of 147; for commodity number 302, 2 out of 31; for commodity number 312, 3 out of 43; for commodity number 362, 3 out of 41; for commodity number 420, 9 out of 90; for commodity number 445, 17 out of 146; for commodity number 470, 2 out of 29; for commodity number 520, 4 out of 48; for commodity number 527, 6 out of 55; for commodity number 682, 12 out of 51; for commodity number 700, 6 out of 88; for commodity number 722, 10 out of 99; for commodity number 872, 6 out of 37; and for commodity number 892, 4 out of 41. For the other 58, there were either no errors found in the sample of 20 or more, or errors were found in a ratio of less than 1 out of 20. The value overcounting or undercounting for any individual commodity or commodity grouping might of course be higher or lower than the item overcounting or undercounting, although on the average it could be expected to be somewhat lower since the average value for errors was lower than the average value of non-error shipments.

The comparison of error items found to total items in the sample for commodity groupings or commodities with less than 20 in the sample is not particularly meaningful. Information on the results of the sample verification will continue to be shown on a cumulative basis, beginning with results for the October 1957 data, in subsequent issues of Report FT 130. Information on the proportion of items in error will then be shown for additional commodities as the cumulative sample reaches 20 for each of them.

SPECIAL NOTICE

DISCONTINUANCE OF FOREIGN TRADE STATISTICS NOTES

The separate publication Foreign Trade Statistics Notes, which has carried supplementary information and explanations of interest to users of foreign trade statistics, has been discontinued. Instead, any special notes prepared for the information or guidance of users will be carried in a current issue of the statistical publications themselves, or in special announcements mailed with the regular publications. Copies will be attached to reference copies of tabulations, where appropriate.

Announcements of new or renewed special foreign trade reports contracted for on a cost basis by users will be shown in the first available issues of Reports No. FT-110 and FT-410. Lists of such special reports will also continue to appear quarterly in the Catalog of Census Publications. Subscriptions to the Catalog may be made, at a cost of $1.25 for 4 consecutive issues including 12 issues of the monthly Supplement (75 cents additional for foreign mailing), through the Government Printing Office. The policy with respect to the furnishing of cost reports, and with respect to cost-sharing arrangements for reports desired by more than one user, was outlined in the April 1958 issue of Foreign Trade Statistics Notes, and is still in effect. Reprints will be furnished upon request. Announcements of any changes in the policy will be made in a current issue of the statistical reports.

Collectors Bulletins listing additional items to be included in the Schedule B commodity classifications, formerly carried in the Foreign Trade Statistics Notes, will also be included in Report No. FT-410.

Users who do not keep permanent files of foreign trade statistical reports should, before disposing of individual issues, clip and retain for future reference any notes which are of lasting interest or which will be needed for future reference.

UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES, BY GROUPINGS OF COMMODITIES

DECEMBER 1960

Commodity grouping number	Commodity grouping description and unit of quantity (and commodity numbers included in the commodity grouping)		Quantity	Value (dollars)
